Exploratory Data Analysis with Python

AIM:

To perform EDA on the Netflix dataset to understand trends, patterns & insights

PROCEDURE:

1. Import & load necessary python libraries
2. Load the Netflix dataset
3. Check dataset info, head, unique values & statistics
4. Data Cleaning.
5. Data Analysis & Visualization

PROGRAM:

```
import pandas as pd, numpy as np, matplotlib.pyplot as
plt, seaborn as sns.
df=pd.read_csv(r"netflix_title.csv")
print(df.head())
print(df.describe(include="all"))
print("No. of unique countries:", df['country'].unique())
plt.figure(figsize=(12,6))
plt.title("Netflix content added over time")
plt.xlabel("Date")
plt.ylabel("Titles count")
plt.grid(True)
plt.show()
```

```
plt.figure(figsize = (10,5))
top_countries = df ["country"].value_counts ().head(10)
plt.title (" Top 10 countries by titles")
plt.ylabel (" count ")
plt.xticks (rotation = 45)
plt.show ()

plt.figure (figsize= (10,6))
genres= df ['listed_in'] . dropna ().str. split (',', expand=
        True).stack ()
plt.title (" Top 10 Genres on Netflix")
plt.xlabel (" count")
plt.y invert_yaxis ()
plt.show()
```

RESULT :

Thus, Netflix content increased over time, mostly from US & the popular genres are drama, comedy are found by exploring the Netflix dataset.

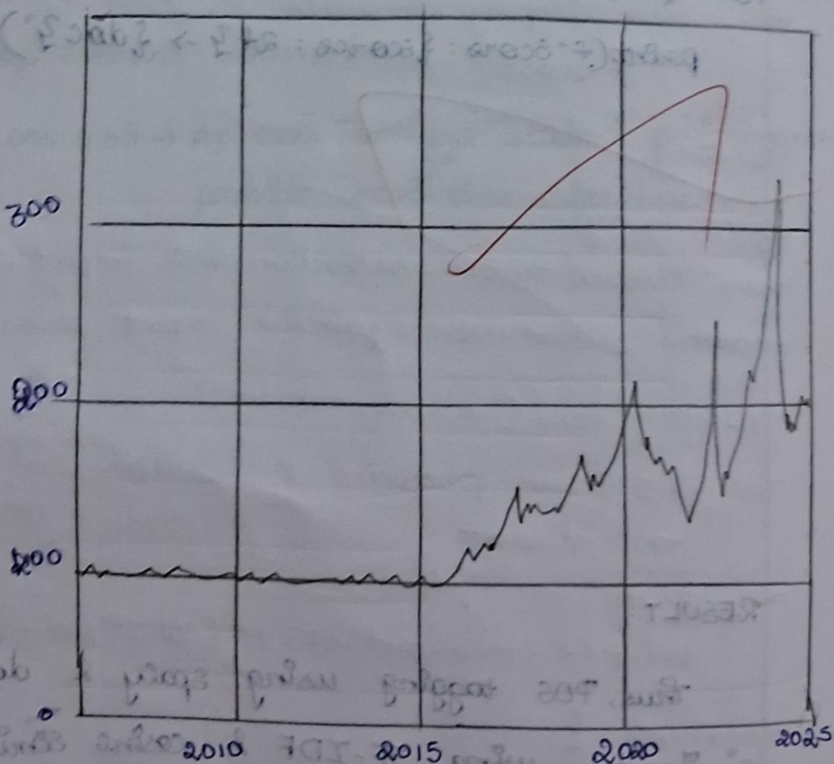
OUTPUT :

<class 'pandas.core.frame.DataFrame'>

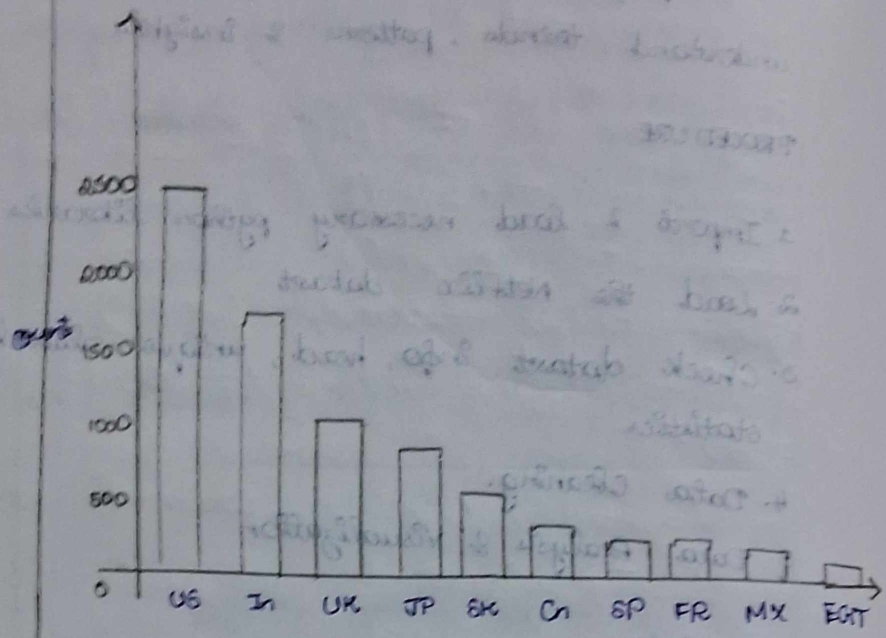
Range : 8807 entries , 0 to 8806

#	columns	Non-null count		Dtype
0	show-id	8807	non-null	obj
1	type	8807	non-null	obj
2	title	8807	non-null	obj
3	director	6173	non-null	obj
:	:	:	:	:

Netflix content added over time.



Top 10 countries by no. of titles



Top 10 Genres on Netflix
