

Interactive Dashboards with Tableau

AIM:

To create a Tableau dashboard that integrates with Google sheet

PROCEDURE:

1. Prepare your Dataset. (Superstore)

|orderDate| category| Market| Region| Sales| Profit| Quantity|

2. Connect your data.

- Open Tableau desktop
- Click connect → MS Excel → your file

3. Create calculated fields.

4. Sales KPI: Create a card showing total sales percentage.

5. Profit KPI: Duplicate sales KPI & change measures to profit

6. Market share Pie chart:

7. Customer Acquisition Chart:

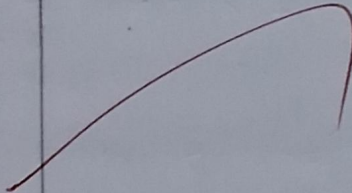

Month (orderDate) on columns, COUNTD (Customer Name) on Rows, Market on color

8. Create Dashboard:

Add a new dashboard & drag all sheets to layout

9. Add filters:

Enable use as filter for interactivity

RESULT:

Thus the program to create a dashboard using tableau is created & executed successfully
